Product Description

Engineered for outdoor adventure, the HME Products Folding Saw Combo Pack includes both a 5" bone blade and 5" wood blade. The bone blade features a built-in stop that prevents the blade from coming out of the cutting groove until the cut is finished. When it comes to cutting branches and limbs around your campsite or hunting spot, the wood blade aggressively cuts on each pull stroke. Blades lock in open or closed position. One screw removal allows you to switch the blades in seconds. Includes a scabbard with belt loop for safe storage and transport.
